

opal PRIMO

Light Cure bond enhancer with drying agent

CONSISTENT BONDING, CONVENIENT DELIVERY

- Hydrophilic drying agent seeks out moisture and draws resin in, ensuring superior bonding
 - Nano-fillers penetrate and fuse to fissures in the enamel rods, ensuring a secure bond
- Contains proprietary synthesized monomers, which improve the bond strengths of all adhesives
 - Unique brush tip offers efficient and economical application

OPAL ORTHODONTICS IS PROUD TO PARTNER WITH SUSAN G. KOMEN FOR THE CURE® IN ITS FIGHT AGAINST BREAST CANCER

Opal Orthodontics is proud to partner with Susan G. Komen for the Cure® in its fight against breast cancer. Purchase Opal Etch, Opal Seal, Opal Bond, Opal Bond MV, or Opal Primo between 05/15/09 and 05/14/10, and Opal Orthodontics will donate 5% of the sales price to Susan G. Komen for the Cure, with guaranteed donations of \$25,000. For more information, visit www.Komen.org

ADHESIVES

TRUSTED, RELIABLE, CONSISTENT

BONDING ESSENTIALS
FROM OPAL ORTHODONTICS

opal ETCH

35% Phosphoric Acid Gel

THE BRILLIANT WAY TO BEGIN BONDING

- Brilliant blue color ensures safe, accurate placement
- Optimal viscosity penetrates fissures without migrating
- Syringe and tip offer controlled delivery, protecting soft tissues
 - Rinses cleanly and completely

opal SEAL

Fluoride Releasing & Recharging Primer¹

RECHARGING ORTHODONTIC BONDING

- Releases and recharges fluoride¹
- 38% filled with substantial glass ionomer plus nano-fillers for long-lasting strength
- Non-yellowing and stain resistant
- Drying agent seeks out moisture and draws resin in, ensuring superior bonding and fluoride uptake
- Fluorescent properties ease reapplication and removal

¹Data on file.

opal BOND & opal BOND MV

Light cure bonding adhesive for metal and ceramic appliances

TWO VISCOSITIES, ONE RELIABLE RESULT

OPAL BOND

- High viscosity allows easy positioning and flash removal
- Super tacky, viscous formula helps eliminate bracket drift while providing ample working time
- Convenient, familiar compule delivery

OPAL BOND MV

- Medium viscosity
- Butters easily into bracket mesh and minimizes drift upon placement
- Proprietary loading process virtually eliminates "run-on"
- Ergonomic contra-angle syringe delivers adhesive with precision and economy
